

## Dozer

# THE FOUNDATION OF THE WORK YOU DO

You've been in the construction industry for a long time. So you know that your work is about more than just moving material. The success of your entire operation can rely on your dozer and the productivity and retention of able operators. With input from customers like you, John Deere has been designing and manufacturing dozers for almost 75 years. Including proven standard features and innovative options that enhance the operating experience and improve ownership economics, our new 650 P-Tier is built on the bedrock of some of your best ideas.

## Set things up

Because no two operators have the same work skill or technique, adjustable hydraulic and transmission settings can be customized to individual user preferences, for responsive control, smooth stability, and precise grading performance.

## It's all about the operator

All-new next-generation cab is 14-percent larger than the previous model, to elevate operator comfort. Redesigned controls that minimize hand and arm movements, advanced touch-screen displays with configurable settings, and optional premium heated/ventilated seat and automatic temperature control (ATC) system help get operators up to speed and in the productive zone.

## Visibility matters

A lower hood line and 14-percent more glass area expand visibility to the blade and jobsite ahead. Optional rearview camera boosts awareness of the activity behind the machine. New LED light package brings things into focus in darker environments.

## Put progress on display

Standard on electrohydraulic configurations, eight-inch touchscreen primary display reveals machine health and configurable settings plus rearview camera and Slope Control (if equipped). Additional 10-inch touch-screen display for navigating the gradecontrol interface is added when the machine is outfitted with dual-laser receivers.

# GRADE-MANAGEMENT SOLUTIONS

Our suite of factory-integrated grademanagement technologies including standard EZGrade and optional 2D Slope Control and Slope Control With Dual Laser simplify difficult grading tasks. These intuitive offerings are easy for operators of any experience level to master. All technology options are fully supported by the John Deere dealer network and can be efficiently upgraded as your operation evolves:

- All-new **EZGrade** feature aids operators in manually grading smooth finish passes by making small blade corrections automatically.
- Slope Control assists in grading and maintaining flat, smooth, and sloping surfaces. Operators can view and set blade slope while the system automatically controls the blade to the desired slope percentage.
- Slope Control With Dual Laser enables operators to automatically control the blade to a specific slope and elevation using a rotating laser.

GRADE-MANAGEMENT OPTIONS STREAMLINE GRADING TASKS & LEARNING CURVES

## **Operator detection**

New operator-presence system uses a built-in sensor to detect that the seat is occupied before the park brake is released, to prevent unintentional machine movement.

### Management fundamentals

Simply set maximum desired ground speed and the power-management system automatically maintains peak engine speed and power efficiency without stalling or shifting.

## Take your turn

Counter-rotation boosts productivity by enabling operators to overcome heavy corner loads and quickly reposition the blade on the go.

## Tough where it counts

Thickened SC-2 coating on the bushings of the optional Maximum Life undercarriage helps reduce wear life by up to 75 percent over standard heavy-duty sealed and lubricated (SALT) undercarriages, to keep working longer. Routings of hydraulic hoses and electrical harnesses have been optimized to reduce leaks, rubbing, and timeconsuming replacement.

## **Fuel saver**

Standard Eco mode automatically adjusts engine speed and powertrain settings based on load, to maximize fuel usage by up to 20 percent compared to standard operating mode, without loss of performance.

### Get a full measure

Integrated welded-on spill sheet on the large 128-inch-wide blade increases capacity and helps reduce damage caused by material spillage behind the blade.

## 650 P-TIER DOZER

## **Precision Construction**

From grade management and obstacle detection to product automation features and jobsite intelligence, this suite of construction technology delivers productivity solutions to help you get more done, more efficiently.

John Deere construction equipment comes with in-base connectivity — free from subscriptions or annual renewals. Analyze critical machine data, track utilization, review diagnostic alerts, and more from **the John Deere Operations Center™**. The Operations Center also enables **John Deere Connected Support™**, which uses data from thousands of connected machines to proactively address issues before they arise. Your dealer can also remotely monitor machine health, diagnose problems, and even update machine software without a trip to the jobsite.\*

\*Availability varies by region and product. Options not available in every country.

## 650 P-TIER DOZER SPECIFICATIONS

While general information, pictures, and descriptions are provided, some illustrations and text may include product options and accessories NOT AVAILABLE in all regions, and in some countries products and accessories may require modifications or additions to ensure compliance with the local regulations of those countries.

## 650 P-TIER

# Additional equipment

### 650 P Engine

- Turbocharged and air-to-air aftercooled
- Electronic control with automatic
   engine protection
- Eco mode
- Dual safety element dry-type air cleaner, evacuator valve
- Exhaust filter, under hood, with vertical stack
- Engine glow-plug starting system
- Automatic turbo cool-down timer
- Programmable auto-idle and auto
- shutdownWet-sleeve cylinder liners
- Remote-mounted fuel filters with
- automatic electronic priming Engine coolant heater, 110 volts
- Rotary ejector engine air pre-cleaner
- Kotary ejector engine an pre-clean
   Severe-duty fuel filter and water separator with heating element

## 100-amp alternator, cab and canopy Cooling

- Hydraulically driven cooling fan, variablespeed suction type
- ▲ Automatic, programmable reversingfan-drive fan
- Engine cooling rated –37 deg. C (–34 deg. F)
- Enclosed safety fan guard (conforms to SAE J1308 and ISO3457)
- Perforated engine side shields
- Heavy-duty, trash-resistant radiator and high-ambient cooling package
- ▲ Heavy-duty perforated grille

Key: ● Standard ▲ Optional or special

### 650 P Powertrain

- Dual-path hydrostatic (HST) transmission
- Reverse-speed ratios (100%, 115%, and 130% presets)
- Remote diagnostic test ports
- Operator-selectable decelerator function (hydrostats and engine or hydrostats only)
- Wet, multi-disc parking brake
- Full power turns with infinitely variable track speed
- Single-lever steering with counterrotate function
- HST (dynamic) service brakes
- Automatic cold-weather transmission warmup system
- Automatic transmission derating for exceeded system temperatures
- 2,000-hour vertical spin-on transmission filter

#### Hydraulic System

- Open-center fixed-displacement hydraulic gear pump
- 3-spool manual control valve
- 3-spool electrohydraulic (EH) control valve
- ▲ 4-spool manual-control valve
- ▲ 4-spool EH control valve with single auxiliary
- 2,000-hour vertical spin-on hydraulic filter

See your John Deere dealer for further information.

#### 650 P Hydraulic System (continued)

- Drive-through hydraulic pump for use with winch
- Electrohydraulics with EZGrade
- ▲ Slope Control system
- ▲ Slope Control With Dual Laser Overall Vehicle
- Front tow loop, bolt-on
- Reinforced engine and mid-frame bottom guards
- Integral transmission guard
- Vandal protection: Engine access door / Side tank access doors / Fuel tank / Instrument panel / Transmission reservoir / Hydraulic reservoir
- ▲ Fluid-sample valves
- ▲ Quick-service ports
- ▲ Forestry limb risers (sweeps)

## Attachments

- ▲ Counterweight, front, 109 kg (240 lb)
- ▲ Retrieval hitch with pin
- Extended rigid drawbar with pin for pull-type implements
- Drawbar, extended for winch (with or without fairlead)
- Rear ripper, parallelogram, 3 shank, 5 pocket
- ▲ Winch, John Deere 4000, power in/ free spool out OR power out
- ▲ Winch, John Deere 4000, low speed, power in/free spool out OR power out
- ▲ 4-roller fairlead for winch
- ▲ Root-rake blade attachment

While general information, pictures, and descriptions are provided, some illustrations and text may include product options and accessories NOT AVAILABLE in all regions, and in some countries products and accessories may require modifications or additions to ensure compliance with the local regulations of those countries.

Net engine power is with standard equipment including air cleaner, exhaust system, alternator, and cooling fan at test conditions specified per ISO9249. Specifications and design subject to change without notice. Wherever applicable, specifications are in accordance with SAE standards. Except where otherwise noted, these specifications are based on a unit with standard equipment, rollover protective structure (ROPS), full fuel tank, and 79-kg (175 lb.) operator.
