## ***THE K-II SERIES LINEUP.***

Got a material-handling app that demands extra agility and ability? There's a John Deere K Series-II Loader for that. Built on the highly reliable platform of their predecessors, these models are loaded with even more customer-inspired productivity- and uptime-increasing features. John Deere PowerTech™ EPA Tier 3/EU Stage IIIA and Tier 2/Stage II diesels provide generous displacement, power, and lugging ability. Daily checks and maintenance access are even easier. And all new K Series-II Loaders come with a standard five-speed transmission and an adaptive clutch cutoff that will help improve productivity compared to previous K-Series models. Get more in a K Series-II.

# DESIGNED TO HIT DEADLINES AND **REACH NEW HEIGHTS.**

K Series-II Loaders come equipped with plenty of production-boosting features to help you handle almost anything you throw their way. But if yours isn't just any application, we've got you covered with a wide variety of factory- or dealer-installed options. So you can equip your loader with exactly what you need to maximize your efforts and expand your opportunities.

## **Let it ride**

With optional ride control, the lift cylinders act as shock absorbers, cushioning bumps to enable quick and easy navigation over rough ground without losing the load. Auto-actuation travel speed is adjustable from 1.5 to 24.0 km/h (1.0 to 15.0 mph) in increments of 0.5 units.

## **See clearly now**

Two side-mounted mirrors enable additional visibility to the jobsite outside the machine.

## **The bucket list**

General-purpose or excavating buckets are available in pin-on or coupler configurations from 1.9–2.7 m<sup>3</sup> (2.5–3.5 cu. yd.).

## **Shake it off**

Full-tire front and rear fenders and flaps help keep the machine free of mud and debris.

## **Material matters**

Opt for forks with 1.52-m (60 in.) tines for versatility in handling a variety of material-moving tasks.

## **Keep it clean**

Self-cleaning steps and convenient handrails provide right-side access to the skid-resistant platform for cleaning windows.

## **On the grid**

Optional corrosion package shields electrical components and connections to help prevent corrosive materials from short-circuiting productivity.

# ***CONTROL YOUR PRODUCTIVITY***

*SEE WHAT YOU CAN DO NOW.*

If you want maximum productivity, a K Series-II Loader should be on your jobsite. It's not just their big torque reserves that make them such impressive performers. Single-lever joystick or two-lever fingertip controls provide smooth effortless control. Excavator-style hydraulics sense the load and deliver the flow needed for smooth combined functions and fast work cycles. PowerShift™ torque-converter transmission on the 524K-II employs smart shift technology to continuously evaluate speed and load conditions, and adjusts clutch-pack engagement to suit. 544K-II and 624K-II feature standard five-speed transmission with lockup torque converter in gears 2–5, to increase acceleration, speed cycles, and optimize power and fuel efficiency during transport, roading, and ramp climbing. You won't find a smoother-shifting loader.

---

## **Speed cycles**

Boom-height kick-out and return-to-carry functions help speed production in repetitive loading applications.

## **Power when you need it**

Engine/hydraulic match maintains good boom and bucket power into and out of the pile, for big loads, even in wet or packed materials.

## **Masters of maneuverability**

Responsive steering and full 80-deg. articulation increase maneuverability in tight quarters, for faster cycle times and fewer three-point turns.

## **Get a grip**

Optional wheel-spin control boosts productivity by improving traction in troublesome material or underfoot conditions. Reduces tire wear, fuel costs, and operator fatigue, too.

## **Refill it up**

Hinged panel tilts away for quick ground-level access to the fuel tank, making refills convenient and easy.

## **Clutch control**

Adaptive clutch cutoff automatically provides more power to the hydraulic system, delivers smooth control at high engine rpms and low speeds, and allows for better machine handling in all terrain without the operator having to change settings.

**WHEEL-SPIN CONTROL**  
OPTION HELPS IMPROVE TRACTION IN  
TROUBLESOME GROUND CONDITIONS

## ***EASY RIDER***

*SEE WHAT COMFORT IN THE CAB FEELS LIKE.*

Long days seem shorter when you're getting things done. And what operator wouldn't be more productive in the high-back air-ride seat of a K Series-II Loader? Up-front, an enhanced multifunction monitor displays operating, diagnostic, and maintenance info on a color LCD screen with easy-on-the-eyes clarity. Generous tinted glass and a low-profile console allow a commanding view of the work ahead. Spacious and quiet cab boasts plenty of legroom and fatigue-beating ergonomics, including convenience features such as seat-mounted loader controls. And sealed-switch module (SSM) with keyless start and effortless push-button operation of numerous machine functions. So you can work harder with less effort.

---

### **Get in the flow**

Adjustable automotive-style louvers provide effective airflow to keep the glass clear and the pressurized cab comfortable.

### **Have a seat**

Cushioning deluxe fabric-covered seat with backrest extension features full adjustment, lumbar support, and air suspension with full-damping capability.

### **Security you can count on**

To help prevent unauthorized machine operation, the keyless-start security system requires a numeric pass code (when activated).

## AUTOMOTIVE- STYLE LOUVERS

ENABLE COMFORTABLE  
CAB AIRFLOW

### In the know

Multi-language color LCD monitor provides push-button access to a wealth of machine data and functions:

- **Vital and general operating info**, including transmission mode, gear, engine rpm, ground speed, fuel level, and fluid temps.
- **Enhanced onboard diagnostics** with speed, pressure, and temperature readings and real-time switch status.
- **Customized machine settings** such as Quick Shift, Auto-to-1st, and optional Ride Control let you match operating characteristics to specific jobs and conditions.

### The choice is yours

Choose single-lever joystick or two-lever fingertip pilot-operated hydraulic controls. Joystick F-N-R selector provides convenient direction and full-range gear changes. Both include innovative Quick-Shift feature for push-button gear changes, one gear at a time.

### Bringing the jobsite into view

Optional rearview camera and radar object-detection system or rearview camera only displays the activity behind the machine on the LCD screen. Emits an audible alert for extra awareness in tight quarters and high-traffic areas.

### All sealed up

Backlit touchpad in the SSM controls keyless start and 24 other machine functions, allowing the operator to activate boom-height kick-out, return-to-carry, and return-to-dig from the seat.

### Cool and collected

Cooler compartment and beverage holder make it handy to stow your lunch.

*BUILT TO TACKLE*

## ***WHATEVER YOU'VE GOT.***

---

It's all about uptime. So we gave the K Series-II plenty of resources to help you succeed. All three loaders come loaded with traditional John Deere durability features such as heavy-duty wet-sleeve diesels, Quad-Cool™, and solid-state electrical systems. Reinforced articulation joints with double-tapered roller bearings. Plus, booms and mainframes so tough they're warranted for three years or 10,000 hours. When you know how they're built, you'll run a Deere.

***HEAVY-DU  
COMPONENTS  
HELP EXTEND WEAR L***

### **Put the brakes on**

Planetary final drives are mounted inboard. Hydraulic wet-disc brakes on all models self-adjust.

### **You'll be a fan**

Optional programmable fan automatically reverses at predetermined intervals, ejecting debris from the radiator and cooler cores. Or set individual cleaning cycles through the monitor.

### **Think outside the box**

Quad-Cool places the radiator, air-conditioner condenser, intercooler, and hydraulic, transmission, and axle coolers (standard on the 624K-II, optional on the 524K-II and 544K-II) in a unique boxed configuration that's isolated from engine heat, boosting efficiency and durability.

### **Never idle**

Auto-idle applies the brakes and automatically reduces engine speed to help conserve fuel after an operator-determined period of inactivity. Auto shutdown turns off the engine after extended idleness.

### **At the starting gate**

Standard starter protection limits cranking time and requires cool-down periods between attempts.

### **Fuel saver**

Hydraulically driven fan runs only as needed for efficient cooling. Helps conserve precious fuel, too.

### **Simplified system**

Electrical-distribution center employs highly reliable circuit-board technology and solid-state switches that eliminate numerous wiring harnesses, fuses, relays, and connectors. Sealed gold-pin electrical connectors resist corrosion, for superior long-term integrity.

### **Keep it out**

3-mm (0.12 in.) side-shield perforations block most airborne debris. Unlike stacked coolers, Quad-Cool cores resist plugging and are easily accessible from either side, for quick and easy cleanout.

### **Switch things off**

Master electrical-disconnect switch is enclosed in a lockable compartment beneath the right-side step, for ground-level convenience.

---

# SAVE TIME

## AND YOUR BOTTOM LINE.

### Give it a spin

Vertical spin-on filters allow quick, no-spill changes. 500-, 2,000-, and 4,000-hour engine, transmission, and hydraulic oil-change intervals help reduce operating costs.

### Be informed

Easy-to-navigate LCD monitor displays diagnostic messages if problems occur, and even offers possible solutions to help get you back up and running quickly.

### Time to take sides

All daily service points including fuel are conveniently grouped on the left side of the machine.

### Easy service

Color-coded fluid-sample and diagnostic test ports help speed preventative maintenance and troubleshooting. Noninvasive design helps keep out contaminants.

### Know on sight

Conveniently located, easy-to-read sight gauges and see-through reservoirs let you check transmission, hydraulic, coolant, and windshield washer fluid levels at a glance.

### Keep it clean

Greasing is less messy, with centralized lube banks providing easy access to difficult-to-reach zerks. Periodic lube and maintenance chart conveniently confirms that nothing gets overlooked.

## ***PRECISION CONSTRUCTION***

This suite of construction technology delivers **Productivity Solutions** to help you get more done, more efficiently.

In-base JDLink™ connectivity provides machine location, utilization data, and alerts to help you maximize productivity and efficiency. Other productivity solutions include grade-management options for multiple machine forms and payload weighing for wheel loaders and articulated dump trucks.

To maximize uptime and lower costs, JDLink also enables **John Deere Connected Support.™** John Deere's centralized Machine Health Monitoring Center analyzes data from thousands of connected machines, identifies trends, and develops recommended actions, called Expert Alerts, to help prevent downtime. Dealers use Expert Alerts to proactively address conditions that may otherwise likely lead to downtime. Your dealer can also monitor machine health and leverage remote diagnostics and programming capability to further diagnose problems and even update machine software without a time-consuming trip to the jobsite.

Net engine power is with standard equipment including air cleaner, exhaust system, alternator, and cooling fan at test conditions per ISO 9249. No derating is required up to 3050-m (10,000 ft.) altitude. Specifications and design subject to change without notice. Specifications with the exception of bucket capacity are in accordance with all applicable ISO standards. Except where otherwise noted, these specifications are based on units with applicable linkage and standard equipment, ROPS cab, rear cast bumper/counterweight, transmission side-frame guards, bottom guards, standard tires, full fuel tank, and 79-kg (175 lb.) operator.
